

Keeping You Safer, Longer

Turnouts and other PPE represent a major investment for your department. With dwindling budget dollars, you want maximum return out of your investment, while maintaining optimum levels of safety.

LION TotalCare®, the leader in PPE maintenance and repair, can help save you money and keep your gear safer, longer.

Why LION TotalCare®?

- LION TotalCare® is a verified ISP that services all brands of PPE. We employ over 20 years of experience and innovation, first-hand manufacturer's knowledge and world-class resources to extend the useful life of your gear.
- It's easy to maintain your gear with LION TotalCare®. We provide prepaid shipping labels online and freight at no extra charge.
- We carry a large stock of gear for temporary use when your PPE is out of service or when your department has a short-term need.
- We have a proven history of satisfied customers of all sizes. Our track record shows that we can extend the safe, useful life of your gear.

LION TotalCare®

Keeping you safer, longer

In the line of duty, even the toughest gear takes a beating.

LION TotalCare® helps you save money and keeps your gear safer, longer.

LION TotalCare® provides professional maintenance services that help enhance fire fighter safety, extend the life of your PPE and save you money.

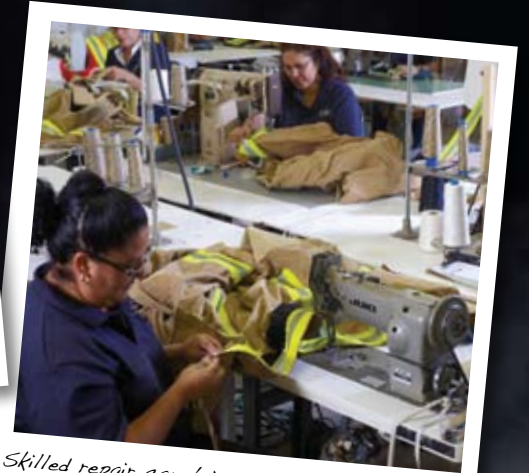

Services include:

- Advanced Inspection
- Advanced Cleaning
- Decontamination and disinfection
- Repair
- Retrofits and alterations
- Rental gear
- Emergency back-up gear
- NFPA 1851 record keeping
- Customized programs

Keeping you safer, longer

In addition to cleaning gear, we provide unparalleled decontamination and an exclusive disinfection process.

Skilled repair can bring gear back to serviceable levels of safety and performance, which will extend its wear life.

Rips, holes, tears and broken hardware diminish the protection of PPE and dramatically shorten its useful life.

Our Ultimate Clean™ Process is nationally recognized as the best in the industry.

Expert inspection detects performance-threatening conditions. Early detection helps prevent ongoing degradation.

NFPA 1851 compliant recordkeeping tracks maintenance history of every PPE element.

If not properly removed, built-up contaminants can destroy the advanced fabrics in your protective clothing and subject you to secondary exposure to carcinogens and toxins.
