Particulate-Blocking Hood

FEATURES & BENEFITS

- ▶ Certified to meet NFPA 1971, 2018 Edition
- ▶ Blocks over 99% of particulates 0.1-1 microns in size throughout the entire hood
- ▶ Air-permeable to help manage core temperature and heat stress
- ▶ Made with a single-layer trilaminate (3-ply) with no intentionally-added per- and polyfluorinated substances
- ▶ Extended bib design provides optimal shoulder and neck coverage that stays in place
- ▶ Ultra-soft, flame-resistant (FR) material for maximum comfort and fire protection
- ▶ Extreme durability that maintains its particulate-blocking effectiveness even after 100 washes
- ▶ Universal sizing that comfortably fits all heads
- ▶ Barcode tag labels for data tracking and asset management
- ▶ Available in Black/Natural (#HD396142) and Tan/Natural (#HD396146)

REDZONE[™]
Particulate-Blocking Hood

LION's RedZone Particulate-Blocking Hoods protect one of the most vulnerable areas of your body by blocking contaminants from touching your head or neck. The NEW LION RedZone[™] Nomex[®] Nano Flex hood is the latest addition to a long history of protective gear offered by LION. This hood protects the head and neck from particulates while remaining flexible, allowing easy movement and unobstructed hearing. Made with a single-layer trilaminate (3-ply) with no intentionally added per- and poly-fluorinated substances, the RedZone Nomex Nano Flex hood maintains superior barrier protection while remaining thin, lightweight, and stretchable.

For more on the RedZone Nano Flex hood, scan the QR code above or contact your LION sales representative.
